Private Equity Investment Approach

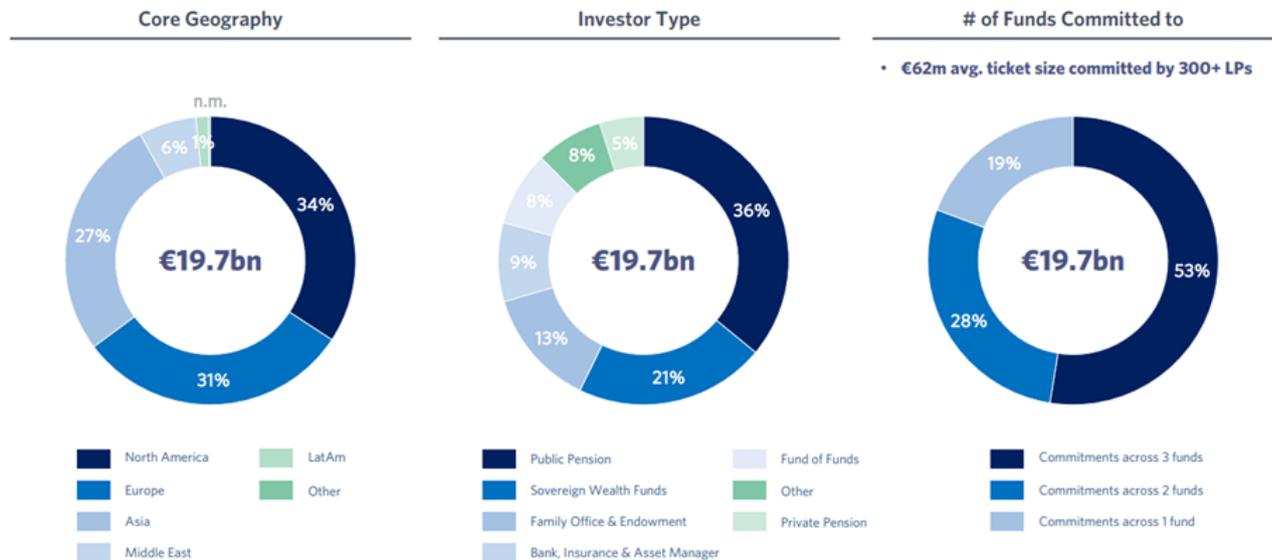

BC Partners has raised 11 successive funds which have invested across our core four sectors of: (i) Services and Industrials, (ii) TMT, (iii) Healthcare and (iv) Food. Examples of such investments are provided below in the section titled '**Our Relevant Portfolio Companies**'.

BC Partners seeks to invest in market leading companies, with enterprise values typically greater than €500 million. BCP requires that its target companies have leading market positions in fundamentally attractive markets with structural growth and compelling or 'mission critical' value propositions that may give rise to resilient revenues and predictable cashflows. Investment holding periods are typically 3 to 6 years.

BC Partners advised funds are solely intended for professional clients (as defined by relevant law and regulation).

The charts below provide a geographic breakdown of the limited partners investing in, or are capable of investing in, UK portfolio companies for the purpose of the Walker Guidelines.

Conflicts of Interest

BC Partners, including BC Partners LLP, adopts a strict stance on monitoring conflicts of interest and we believe the arrangements we have implemented are sufficient to appropriately manage any such incidents, should they arise. Our Conflicts of Interest Policy is detailed in the firm's Compliance Manual. Alongside our annual conflicts of interest training, our Conflicts of Interest Policy ensures all our staff are aware of the importance of identifying and disclosing conflicts of interest at an early stage. This, along with other systems and controls, aids with the identification of any potential conflicts. The firm also operates an ongoing conflicts register of actual and potential conflicts of interest to ensure any conflicts are well-managed.
